Architecture Professional program

The Architecture Professional Program (PPAr) is an educational program designed to prepare Bachelor of Architecture graduates to become professional architects.

Department of Architecture and Planning
Faculty of Engineering
Universitas Gadjah Mada
Jl. Grafika No. 2, Sekip, Yogyakarta 55281

About Us

The Architecture Professional Program (PPAr) is an educational program designed to prepare Bachelor of Architecture graduates to become professional architects. The program's teaching is conducted through design practices that mirror real-world conditions in the architectural profession. This program aims to prepare students to become creative individuals who are internationally competitive, environmentally and socially conscious, and act professionally in the field of architecture.

Curriculum

Professional program is intended for graduate program (or its equivalent) and engineers to develop their skills and abilities for professional work as an architect. Our curriculum refers to the architectural education standards and the professional architectural practice from various bodies (QAA Higher Education, APTARI, and UIA). Current curriculum also met the KAAB standards by applying Student Performance Criteria (SPC) in the courses given to students.

Professional Memberships

Graduates of the program possess professional qualifications and are eligible to obtain an architect license from the IAI (Ikatan Arsitek Indonesia) after fulfilling specific requirements per the applicable regulations.

Courses

Semester 1

Professional Design Studio 1
Art, Culture, Technology in Architecture
Project and Studio Management
